

WATER IN PLAIN SIGHT

An evening conversation with author Judith D. Schwartz

An uplifting and educational evening with Judith D. Schwartz, a freelance writer whose work explores how restoring water cycles can help mitigate climate change.

HEAT! DROUGHT! INTENSE STORMS!

Water in Plain Sight explores how the water cycle intersects with climate, biodiversity, food security, and peace/conflict, and how understanding water processes--the way water moves across the land and through the air--presents opportunities to address our many challenges.

Hosted By Biodiversity For A Livable Climate & The Concord Area Biodiversity Collaborative (BioCAN) and Co-Sponsored By: OARS, ConcordCAN, Concord Natural Resources Commission, New England Wildflower Society, Sudbury Valley Trustees

WHERE: Harvey Wheeler Community Center
1276 Main St., Concord, Mass.

WHEN: Friday, Oct. 14

TIME: 7 – 9 PM

Reserve Space Now: Contact: biocanconcordarea@gmail.com
