

Solstice Lantern Directions

Supplies:

- Hammer
- Awl or large nail
- Large tin cans -- like tomato cans
- Roofing nail (with a large head)
- Candle
- Water-based marker
- Wire coat hanger (optional, for handle)

Directions:

1. Use water-based marker to make pattern on the tin can.
2. Fill the can with water and put it in the freezer until the ice is solid.
3. Remove from freezer and use hammer and awl or nail to poke holes in the can following the pattern.
4. Hammer roofing nail with large head through the center of the bottom of the can and leave it there. The candle will be stuck onto this.
5. Melt the ice, attach the candle, and voila!
6. If you want, attach the coat hanger handle.
